Dear Committee,

I am writing to highly recommend Anna Paulish, who completed a half-year internship at our company from February 2022 to July 2022 for receiving the Master's fellowship in Inspire Potentials program. During her time with Johnson Electric, Anna demonstrated a high level of dedication and commitment to her work, consistently impressing us with her attention to detail and well-structured approach to problem-solving.

Anna was an excellent addition to our team, demonstrating a positive and friendly attitude that made her a pleasure to work with. Her ability to collaborate effectively with other team members and take constructive feedback enabled her to excel in her role.

In particular, I would like to highlight Anna's significant contributions to the development of a new product testing methodology that has the potential to significantly reduce the cycle time of product testing, leading to cost savings for our company. Anna played a key role in co-developing this methodology, demonstrating exceptional technical skills, attention to detail, and problem-solving abilities.

I had the pleasure to supervise Anna during her internship at Johnson Electric. Among three students whom I co-supervised, she clearly excels in terms of professional maturity and work attitude.

Overall, I highly recommend Anna for receiving the Master's fellowship in Inspire Potentials program. Her dedication, professionalism, and exceptional work ethic make her an asset to any organization. If you have any further questions or require additional information, please do not hesitate to contact me.

Sincerely,

Senior Data Science Engineering

Roman Klis, dr sc. ETHZ
